

Multiple Nyx 330

Design: Vilhelm Lauritzen Architects

Nyx 330 is available for mid-column mounting of one or more fittings at a cylindrical post or extender tube.

Below we specify three different solutions for mounting three fittings at 6.6, 5, and 4.8 meter columns respectively, as well as two solutions for mounting two opposite fittings at 5 or 4 meter columns.

In all cases we use a conical pole with a cylindrical extender tube. In case of three mid-column fittings, the lower fitting is placed at the connection between post and extender.
